they've been hijacked by policy entrepreneurs who offer easy answers to hard problems

the past twenty years have been an era of economic disappointment in the United States they have also been a time of intense economic debate as rival ideologies contend for policy influence above all they have been the age of the policy entrepreneur the economic snake oil salesman right or left who offers easy answers to hard problems it started with the conservative economists Milton Friedman at their head who made powerful arguments against activist government that had liberals on the defensive for many years yet when Ronald Reagan brought conservatism to power it was in the name not of serious thinkers but of the supply siders whose ideas were cartoon like in their simplicity and when the dust settled it was clear that the supply side treatment not only had cured nothing but had left behind a 3 trillion bill meanwhile the intellectual pendulum had swung in the 1980s even while conservatives ruled in Washington economic ideas that justified government activism were experiencing a strong revival but the liberals it turns out have their own supply siders the strategic traders whose simplistic vision of a U.S. economy locked in win lose competition with other countries proved far more appealing to politicians than less dramatic truth and it seems all too likely that the new patent medicine will do as much harm as the previous one in this provocative book Paul Krugman traces the swing of the ideological pendulum from left to right and back again and the strange things that happen to economic ideas on their way to power

Hudson shows how it has attracted powerful political supporters and is

promoted by a network of institutions and policy advocates dedicated to its ideals the libertarian illusion offers a well researched balanced and systematic critique of libertarian policy proposals on both the conservative taxation and fiscal policy health care social security and business regulation and liberal abortion stem cell research and euthanasia sides of the traditional political spectrum always engaging and provocative hudson hones in on the fundamental value differences that drive political debate arguing that a more communitarian outlook offers solutions more likely to solve america s policy problems

in her recent book suiting themselves bestselling author sharon beder exposed how the global corporate elite have brazenly rewritten the rules of the global economy to line their pockets in this new book she trains her sights on the insidious underbelly of this global trend to show how they have also orchestrated a mass propaganda campaign to manipulate community values and convince us that their interest co opting and controlling all of us in the name of the free market is in our interest during the 20th century business associations coordinated mass propaganda campaigns combining 20th century american pr methods with revitalized free market ideology from 18th century europe the aim was to persuade people to eschew their own power as workers and citizens and forego their democratic power to restrain and regulate business activity sophisticated corporate funded think tanks augmented these campaigns in the 1970s and 1980s promoting free enterprise and business friendly policies these free market missionaries now seek to change individual and institutional values through bolder strategies such as expanding share ownership and manipulating wider public concerns in each case the goal is the same the triumph of business values over community values beder s is an intellectual call to arms challenge the ideology of the free market missionaries or be converted to it

want to eliminate poverty then we should say so but if we do want to reduce poverty significantly he says we must expand decent jobs and government income programs redirecting national resources away from the rich and toward those with low incomes why america lost the war on poverty and how to win it is sure to prompt much needed debate on how to move forward
